

SEAWAYS GLOBAL & SEASPAN MARINE PROJECT

In May 2018, SeaWays Global, a leading provider of tug master and pilot training solutions, and Seaspan Marine, a well-established provider of marine services, operating along the west coast of North America, announced their strategic partnership. The 5-year contract covers the installation of a multi-console tugboat simulator at the Pemberton Campus and complete simulator and live training solution.

The simulator is based on the latest generation of the Transas Navi-Trainer Professional 5000 (NTPro 5000) and features 360-degree horizontal field of view, ship-like consoles with a complete set of dedicated hardware controls and professional displays for all functions. By bringing expertise and technology together SeaWays Global provides the trainees with the training solution which helps them to build confidence and muscle memory in a controlled and safe environment. Simulator training covers topics and exercises including basic and advanced manoeuvres, towage in a harbour environment, tethered escort of deep-sea ships and more.

By choosing SeaWays Global, Seaspan Marine gained access to the only tug master training programme accredited by the ClassNK Classification Society.

Quick Facts

The Marine Simulator Facility is the first and only of its kind in North America

Once training is complete mariners receive a competency certificate, which is maintained via regular review sessions in the simulators

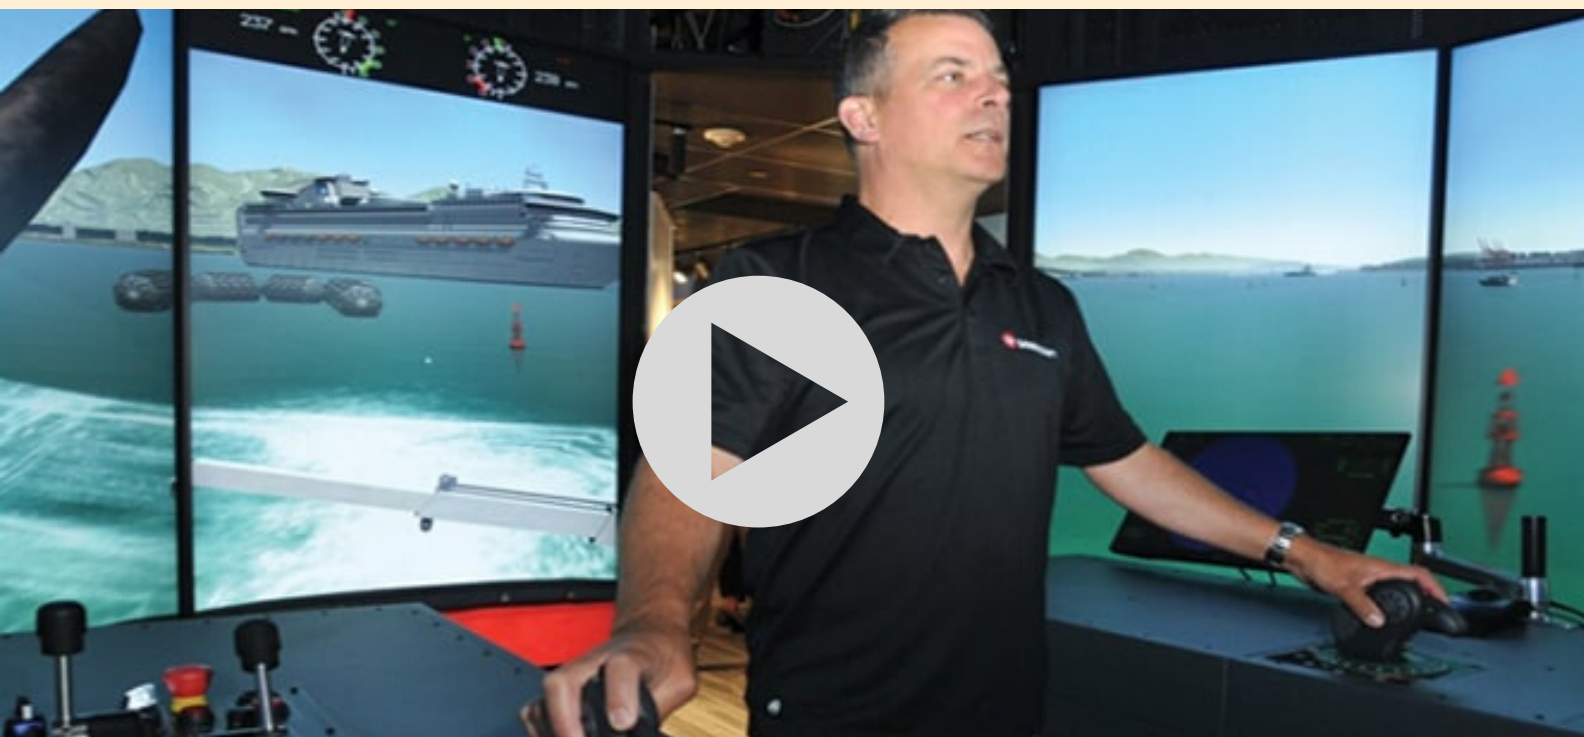

Simulator and classroom training are followed by one week of 'Live on Board' training on actual Seaspan tugs

30

Number of ocean, river, harbour and escort tugs owned by Seaspan Marine

At the culmination of the training programme, students are required to complete all manoeuvres successfully in a simulated competency circuit environment. Firstly the instructor completes the circuit to set the baseline time and the student is then required to execute 4 successful circuits within 130% of the instructor's time

OUR PRIORITY IS TO SUPPORT HIGH QUALITY AND SAFE OPERATIONS AT SEA AND WE FEEL THAT WE OFFER THE BEST SOLUTION TO ANSWER THE EVOLVING NEEDS OF OUR CUSTOMERS, - SAID NEIL SADLER, SEAWAYS GLOBAL MANAGING DIRECTOR FOR AMERICAS AND MIDDLE EAST.
